BOOSTING DIGITAL TRANSFORMATION OF HEALTHCARE ACROSS REGIONS

Castilla y León, Spain

I3 Instrument
Strengthen Innovation
in Europe's Regions

I3 Interregional Innovation Investments Instrument

Co-funded by
the European Union

The HealthChain
PROJECT AT GLANCE

HEALTHCHAIN offers a model for co-created, demand-driven technological solutions in health care by creating optimal value-chains. It provides a framework in which innovations do not arise from technological vacuum and therefore have a short lifespan.

10 European regions from 8 countries

33 SMEs cocreating solutions with healthcare organisations

24 Digital solutions to be implemented in 10 hospitals focused on:

- Self-management
- Care coordination
- Data Integration & Management
- Education & Information
- Remote patient monitoring
- Data Analytics & AI
- Symptoms tracking
- Diagnostics

CASTILLA Y LEÓN REGION

Healthcare Organisation

Los Montalvos Hospital

Los Montalvos Hospital, a palliative care reference center in Castilla y León for over 20 years, provides comprehensive socio-healthcare for advanced patients. With a Palliative Care Unit and 24/7 Home Support Teams, the hospital prioritizes emotional well-being.

Ecosystem supporter

FUNDACIÓN INTRAS

Fundación Intras is a non-profit with 30 years of expertise, focuses on integrated mental health and aging care. They drive innovation, manage R&D projects, and coordinate initiatives for well-being and independent living promotion.

EMOPALL

EMOPALL is a set of tools that allows palliative patients to be remotely monitored at home. Tools are assessing the emotional state of patients via voice analysis, triggering alerts for timely professional intervention.

BLUE Connecting Emotions SL

- Remote emotional monitoring of palliative patients
- Timely intervention based on emotional distress alerts
- Reduces the frequency of phone calls with patients

HEALTH CHAIN

SOLUTION

EMOPALL

CASTILLA Y LEÓN REGION
Spain

EMOPALL is a set of tools that allows palliative patients to be remotely monitored at home. Tools are assessing the emotional state of patients via voice analysis, triggering alerts for timely professional intervention.

- Enables continuous emotional state tracking, improving early intervention for palliative care patients.
- Increases accessibility of personalized care for remote palliative patients using a mobile app.
- Provides timely alerts to healthcare professionals, enhancing the quality of care.
- Helps prevent patient suffering by predicting emotional distress early.
- Ensures compliance with GDPR, safeguarding patient data privacy while improving care.
