BOOSTING DIGITAL TRANSFORMATION OF HEALTHCARE ACROSS REGIONS

Western Greece, Greece

I3 Instrument
Strengthen Innovation
in Europe's Regions

Co-funded by the European Union. Views and opinions expressed are, however, those of the author(s) only and do not necessarily reflect those of the European Union or the European Innovation Council and SMEs Executive Agency (EISMEA). Neither the European Union nor the granting authority can be held responsible for them.

HEALTHCHAIN offers a model for co-created, demand-driven technological solutions in health care by creating optimal value-chains. It provides a framework in which innovations do not arise from technological vacuum and therefore have a short lifespan.

10

European regions from 8 countries

33

SMEs cocreating solutions with healthcare organisations

24

Digital solutions to be implemented in 10 hospitals focused on:

Self-management

Care coordination

Data Integration & Management

Education & Information

Remote patient monitoring

Data Analytics & AI

Symptoms tracking

Diagnostics

Healthcare Organisation

University General Hospital of Ilias

The General Hospital of Ilias, serving the community since 1886 is a leading healthcare provider for the City of Pyrgos and the surrounding region. Located just outside Pyrgos in Syntriada, this 280-bed facility spans 80,000 square meters and offers a wide range of services.

Ecosystem supporter

DOCTORSHELLO™

Doctorshello is a patient-centric healthcare ecosystem initially focused on senior well-being. It collaborates with hospitals and stakeholders to tackle real medical challenges, optimizing healthcare processes for societal well-being.

RETIMO

RETIMO is a remote monitoring system for real-time tracking of medical parameters, secure video communication, and AI-assisted diagnostics. Enhances healthcare decision-making and reduces unnecessary hospital visits. RETIMO is developed by Digital Health Services Monoprosopi P.C.

Digital Health Services
Monoprosopi P.C.

Enables real-time health monitoring and emergency detection

Reduces hospital visits

Supports home-based care

RETIMO is a remote monitoring system for real-time tracking of medical parameters, secure video communication, and AI-assisted diagnostics. Enhances healthcare decision-making and reduces unnecessary hospital visits.

-  Provides encrypted video consultations for instant patient-caregiver communication.
-  Optimizes healthcare workflows by reducing unnecessary hospital visits and physical exams.
-  Empowers patients with accessible, real-time health data and professional guidance.
-  Improves chronic disease outcomes with continuous oversight and risk model integration.
-  Customizable system adapts to diverse healthcare settings, enhancing scalability and adoption.
